

RAUL PAYA

Game Developer

PROFILE

A 39 years old Navy retiree with great enthusiasm about games across all platforms and game innovation, I have been studying programming by myself from scratch as a hobby since my young age.

My biggest influence is Super Nintendo and Japanese RPG.

So I came to Japan in 2017 to pursue official study of programming and look for a job as a developer.

I want to share my insights and make unique games and apps, with my identity defined by navy values.

In my personal portfolio I post my work that I enjoy doing during spare time and that I have learnt.
